Subject: Regional Arterial Plan Steering Committee

Dear Regional Partners,

At the beginning of 2018, CAMPO will be launching the planning process for the region's first ever Regional Arterial Plan. The plan purpose is to understand the existing role and function of the region's major arterial corridors and to define their future role(s) and function(s) by mode. The Regional Arterial Plan will include a facilities inventory, a review of the most current applicable regional policies and data, 2045 illustrative and priority networks, guidance and recommendations on facility design and policy, performance measures, and an implementation plan with project and policy priorities for the next 25 years. In order to develop this plan, CAMPO is forming a steering committee inclusive of local, state, and regional agencies to guide the planning process. You or another designee from your entity are being asked to serve on this committee. The role of committee members includes:

- *Attend and participate in 4 – 6 in-person steering committee meetings held through the duration of the 10-month planning process.*
- *Review draft deliverables and provide feedback to CAMPO staff on the planning process*
- *Assist and participate in public outreach activities including advertising meetings, assisting with identifying and securing venues, as well as attending and participating in open houses*
- *Inform your elected officials and other stakeholders about the planning process*
- *Provide input to the Technical Advisory Committee on the draft documents*

Please respond to this email if you are able to serve on the committee or identify who your entity's designee will be on the committee. CAMPO will inform you of the first meeting of this group once a detailed project timeline has been developed for the planning process. Please contact me if you have any questions.

Thank you.
